NATURE OF THE ACTION

2. This is an action for patent infringement arising under the patent laws of the United States, 35 U.S.C. §§ 271, *et seq.* to enjoin and obtain damages resulting from Defendants' unauthorized manufacture, use, sale, offer to sell and/or importation into the United States for subsequent use or sale of products, methods, processes, services and/or systems that infringe one or more claims of United States Patent No. 6,256,606 ("the '606 Patent"), entitled "Silence description coding for multi-rate speech codecs," United States Patent No. 7,120,578 ("the '578 Patent"), entitled "Silence description coding for multi-rate speech codecs," United States Patent No. 6,275,794 ("the '794 Patent"), entitled "System for detecting voice activity and background noise/silence in a speech signal using pitch and signal to noise ratio information," United States Patent No. 6,507,814 ("the '814 Patent"), entitled "Pitch determination using speech classification and prior pitch estimation," United States Patent No. 7,266,493 ("the '493 Patent"), entitled "Pitch determination based on weighting of pitch lag candidates," United States Patent No. 6,633,841 ("the '841 Patent"), entitled "Voice activity detection speech coding to accommodate music signals," United States Patent No. 6,104,992 ("the '992 Patent"), entitled "Adaptive gain reduction to produce fixed codebook target signal," United States Patent No. 6,385,573 ("the '573 Patent"), entitled "Adaptive tilt compensation for synthesized speech residual," United States Patent No. 6,539,205 ("the '205 Patent"), entitled "Traffic channel quality estimation from a digital control channel," and United States Patent No. 6,680,920 ("the '920 Patent"), entitled "Power management system for a mobile station" (collectively the "Patents-in-Suit"). Plaintiff seeks injunctive relief to prevent Defendants from continuing to infringe the Patents-in-Suit. In addition, Plaintiff

seeks a recovery of monetary damages resulting from Defendants' past infringement of these patents.

3. This action for patent infringement involves Defendants' manufacture, use, sale, offer for sale, and/or importation into the United States of infringing products, methods, processes, services and systems that operate using Global System for Mobile ("GSM") communications and/or using Wideband Code Division Multiple Access ("W-CDMA") communications and/or that utilize one or more Adaptive Multi-Rate ("AMR") voice characterization and/or compression codecs.

4. On July 30, 2008, WiAV filed a complaint for patent infringement against RIM, Apple and another defendant in an action assigned Civil Action No. 3:08-cv-00485-REP. The dispute between WiAV and Mindspeed regarding Mindspeed's obligations has not been resolved. Therefore, on September 26, 2008, prior to the filing of this action, a dismissal without prejudice was filed with the Court for Civil Action No. 3:08-cv-00485-REP. None of the defendants in that action had answered or otherwise filed a responsive pleading to the complaint. This action is therefore a related action to Civil Action No. 3:08-cv-00485-REP. WiAV has filed this action to preserve its right to pursue its rights against RIM and Apple in its chosen forum and in parallel, is seeking appropriate legal remedies to resolve the dispute with Mindspeed.
